

BUILDING DESIGN SERVICES

LEE'S FAMOUS CHICKEN RECIPE –ROLLA, MO

Integrity Engineering, Inc. assisted Lee's Chicken-Rolla with design services for an addition that doubled its dining space and renovated their existing dining area. The new exterior created a whole new front for the restaurant and drastically improved the restaurants appearance. The interior improvements included redesigning the customer ordering experience, relocating and expanding the drink station, and adding a new WiFi bar where customers can charge phones and laptops and have access to the restaurants wireless internet. The dining room addition has greatly improved the customer flow at the front of the restaurant and doubled seating capacity in the restaurant. Because of all of these improvements, Lee's can better serve an expanded customer base. Integrity performed architecture, structural, MEP, site design, bidding, and construction administration services .
